DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/22/03 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-25 and 74-75 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: the way in which the at least one component of the biological sample is resolved to create an enriched fraction, as well as the manner in which the enriched fraction is used to determine the expression pattern of the sample.

5. Claim 4 recites the limitation "said hydrophilic ligand" in line 1 of the claim. There is insufficient antecedent basis for this limitation in the claim. The parent claim only refers to a hydrophilic matrix with a ligand coupled to it.

6. In claim 11, applicant should replace the comma in line 2 with "and".

Art Unit: 1641

7. Claim 14 is rejected as vague and indefinite because it appears that the claim is broader than claim 13, on which it depends, rather than narrower in scope.

Response to Amendment

8. The declaration under 37 CFR 1.132 filed 6/27/03 is sufficient to overcome the rejection of claims 1-25 and 74-75 based upon Zuckerman et al. (WO 98/42730).

Allowable Subject Matter

9. In view of applicant's amendments and 37 C.F.R. 1.132 declaration, claims 1-25 and 74-75 are allowable over the prior art of record.

10. The following is a statement of reasons for the indication of allowable subject matter: the closest prior art of record fails to disclose or teach a method of determining a biological sample expression pattern, wherein a sample is applied to an affinity support comprising a ligand coupled to a hydrophilic matrix, wherein the ligand has a plurality of hydrophilic and affinity groups pendant therefrom, and the ligand has a binding affinity that is intermediate between charge-based and antibody based ligands, such that the ligand partially resolve the biological component. Once the component is resolved to provide an enriched fraction, this fraction is used to determine the biological sample component expression pattern.

11. Claims 1-25 and 74-75 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Conclusion

Claims 1-25 and 74-75 are rejected.
